

## 140 Series Joint Covers

140 Series Joint Covers

140 Series Joint Covers

**140 Series Joint Covers** are intended for use with hardboard and cement siding. The Joint Covers protect the butt joint where two siding planks meet and provide an expansion joint to help prevent siding buckling. A wraparound lower lip hooks the siding and requires one nail to hold it in place. They are manufactured with either a smooth or wood grained texture and are available in lengths and return lip widths to fit all major brands of hardboard and cement fiber siding.

**140 Series Prefinished Joint Covers** are stocked in all of the James Hardie ColorPlus® colors, some of the CertainTeed's ColorMax® colors, and a variety of other manufacturer's and pre finisher's colors. We are constantly expanding our line of prefinished material offerings, so check for availability. Colors have been carefully developed and matched for both color and sheen.

140 Series Prefinished Joint Covers
