

Junction Flashing

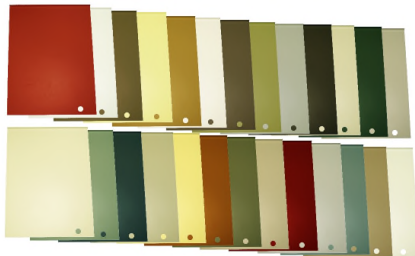

Junction Flashing

The **Simplicity Tool Junction Flashing** is manufactured for all types of siding as a weather resistant barrier at the butt joint seam. This precut Junction Flashing allows for fast and easy installation and the ¼" Slip Fit Positioning Lip insures quick and accurate placement every time. Manufactured from 0.016" primed aluminum, we offer a choice of either brown or white. Simplicity Tool Junction Flashing is a full 6" wide to provide the 3" coverage on each side of the butt joint seam called for by popular siding manufacturer's best practices. Sizes are precut and come 50 pieces per box for fast and easy installation.

Coated Brown or White Junction Flashing

Please Specify Brown or White when ordering.

Prefinished Junction Flashing

The **Simplicity Tool Prefinished Junction Flashing** are stocked in all of the James Hardie ColorPlus® colors, some of the CertainTeed's ColorMax® colors, and all of the EasyShield™ colors. Colors have been carefully developed and matched for both color and sheen.

Junction Flashing w/ Belt Hook Kit

The **Simplicity Tool Belt Hook** is a safe, efficient tool for keeping Simplicity's Junction Flashing close at hand. The belt hook is designed to hold up to 50 pieces slightly fanned for easiest access. This allows few trips up and down the ladder and saves labor during installation.
